General information about Lucknow

Lucknow the second largest city of northern India and the capital city of Uttar Pradesh in India, situated on the River Gomati. The city retains its age old charm and is renewed for its etiquette and courteous culture, popularly known as the "Lucknawi Tahzeeb". Its deep rooted traditions, imposing inspiring historical monuments and mouth watering cuisine are major draws for tourist. The city is a delight for academic and research pursuit with several world renowned research laboratories and educational institutes being located here viz. Giri Institute of Developmental Studies, Banker Institute of Rural Development National Botanical Research Institute, Central Institute of Medicinal and Aromatic Plant, Indian Institute of Toxicological Research, University of Lucknow, Babasaheb Bhimrao Ambedkar University (central university), King George Medical University, to name a few.

Weather

The month of October is the beginning of the winter season but the weather is moderate and very light woollen clothes may be required.

How to Reach University

Three-Day International Conference on “Dynamics of Economic Growth and Development in Asia with Special Reference to India ”

25th-27th, October 2017

Babasaheb Bhimrao Ambedkar University

Accredited 'A' Grade by NAAC
(A Central University)

Vidya Vihar, Raebareli Road, Lucknow-226025
Uttar Pradesh, India

About the University

Babasaheb Bhimrao Ambedkar University, Lucknow is one of the premier Central Universities in the country established on 10th January 1996 with the objective of promoting advance knowledge by providing instructional and research facilities in Sciences key and frontier areas of technology, social sciences and other disciplines. The University promotes the study of the Principles for which Babasaheb Bhimrao Ambedkar worked during his lifetime and pay special attention to the promotion of educational and economic interests and welfare of the people in general and members belonging to SC/ST in particular. The university is running with Ten Schools and 45 Departments offering UG., PG., M.Phil and Ph.D. programmes. Nearly 5000 students are pursuing different courses in the university.

About the Department

Department of Economics is one of the oldest department of the University. The Department is running one full time Master Course in M.A Economics and also offers Ph.D and M.Phil. programmes with main emphasis on innovative and empirical research on various aspects of the economy. The Department is working with a vision of creating global leaders, having advanced infrastructural facilities like Computer lab, Library, Conference hall and eminent faculty members to train the students in accordance with the need of the job market. The Department has always been conscious of and responsive to socio-economic needs of the society at large.

Concept Note of Conference

Asia has emerged as an economic power and ray of hope in providing an alternative option apart from America and Europe after globalisation. It consist nearly 60 percent world population and 30 percent area of the world. When the economies of rest of the world are in turmoil with very low economic growth due to sub prime crisis of US economy, most of the countries of the Asia have ensured the growth rate well above 6 percent. Emergence of India and China in the post reforms period is being considered as the first step in the direction of making multi polar world. The rich human and natural resources with very good climatic conditions also support in this direction. After the great scientific revolution of Europe, which established the mechanistic view of nature and rejected the dualistic view, Europe and America are dominated over the world in terms of ideas and values as well as in economic activities. But the success of India and China, which is based on their own domestic resources and unique ideas and policies, are providing sufficient reasons to believe that, the 21st century is going to be of Asian countries.

Though many positive developments have taken place in favour of Asian countries in recent past but still many more issues and problems need to resolve to realise the full potential of this continent. Asia is much diversified set of the countries. On the one hand countries like Japan and South Korea, which are in the list of developed countries, and the countries like Bangladesh, Pakistan, Myanmar, Srilanka and Afghanistan are on other hand under developed as well as politically instable and facing number of internal problems. Among these Asian countries there are countries like India and China that are politically stable and internally strong, and growing quite well. These countries are the hope for Asia as well as for the whole world. Lack of cooperation among these three set of the countries, unlike Europe and North American countries, is biggest hurdle for the development of the continent. It is reflecting in

trade relations, economic cooperation as well as political and social cooperation. However, it could be achieved because of basic values, which are the common in whole continent. Strong cultural and religious relations among the countries of Asian continent are also supporting in this direction. India and China can play very crucial role in this direction. The globe is indeed looking at these two countries with renewed interest. Almost every macroeconomic variable has been affected by the process of globalization. Be it foreign direct investment, foreign portfolio investment, business process outsourcing, technology transfer, information technology advancements, foreign trade of goods, services and capital, foreign exchange reserves or national income. Making free trade area to whole continent, single currency for Asian region, free flow of capital and development in social indicators, are some of the issues which could be resolved. It will help in development of countries of the Asia. In this context it is the right time to discuss the contemporary macro economics of developing Asian economies to provide some inputs and direction of making Asia the dawn of new hope for the world. To introspect on the dynamics of macro economics of the developing Asian countries with special reference to India, the Babasaheb Bhimrao Ambedkar Central University, Lucknow, India is organising three days international conference during 25th – 27th October 2017. We are inviting scholars, academicians and policy makers of Asian countries and other part of globe to share their findings of research on the sub themes, of the conference.

The International conference is proposed to organise with following sub-themes:

Sub-Themes of the Conference

- Development trajectories and sectoral growth of Asian Economies
