Thesis/Dissertation

M.Phil. in Economics: Poverty Alleviation Programme (MGNREGA) in Jhansi District

Ph.D. in Economics: An Economic Analysis of Climate Change Effects on Agricultural Productivity: A case study of climate vulnerability of farmers in Bundelkhand region of Uttar Pradesh

(C) Research and Teaching Experience: 4 Years

Teaching Areas : Economics of Climate Change, Environmental Economics, Statistics, Agricultural Economics, Mathematical Economics, Statistical Methods, Advanced Econometrics Methods with Computer Application

Research Areas : Climate change and agricultural productivity, livelihood and climate vulnerability, climate resilience, food security, soil sustainability, vulnerability of urban slums, livelihood security of rural and urban population

Significant contribution in the field of climate change impacts on agricultural Productivity

: projected climate change impact on agricultural production in mainstream agro-climatic zones of India using CODEX- RCP scenarios. Disaggregate level analysis for districts pertaining in western dry region also made.

Significant contribution in the field of climate change effects on livelihoods of the Indian farmers

: By using IPCC- vulnerability framework suggested in AR5, vulnerability of mainstream agro-climatic zones of Uttar Pradesh, Gujarat and Rajasthan to climate change also assessed. Food and soil sustainability were also examined of major Indian states IPCC-framework.

Significant contribution in the field of Climate adaptation strategies in Indian agriculture

: By using multi-criteria approach, determinants of climate change adaptation strategies were examined in the rain-fed regions of India. How a rational farmer decides a correct and cost-effective adaptation strategy to cope with changing climate was assessed.

Significant contribution in the field of Climate Resilience strategies in Indian agriculture

: By using large-scale district-level data of 26 mainstream agro-climatic indications, climate resilience of Indian farmers was assessed. Our work covered 616 district of India and results are millstone for climate policy planning

Significant Contribution in Large Scale Data Use

: Expert in handling Large-scale data such as 59th, 69th, 70th, 76th 77th rounds of NSS; DHS, NFHS & Sage Social Science Database. Expert in handling NFHS- 1, 2, 3, 4 & 5 unit level-data, DHS database, ICRISAT- VDSA, Daily gridded data of rainfall and temperature, time- series, cross- sectional and panel-data. Expert in estimating Descriptive Statistics, Multiple Regression, Logit & Tobit modelling, and Indexing.

Award and Recognition

: Awarded best paper on livelihood security by National Institute of Rural Development and Panchayati Raj.

(D) Fellowship Awarded

1. Rajiv Gandhi National Fellowship for Ph.D. during 2013-2017
